About Kropz Plc

Kropz is an emerging plant nutrient producer with phosphate projects in South Africa and the Republic of Congo ("RoC"), and an exploration asset in Ghana. The vision of the Group is to become a leading independent phosphate rock producer and to develop into an integrated, mine-to-market plant nutrient company focusing on sub-Saharan Africa.

Kropz's Elandsfontein Phosphate Project is a near-term producing asset in South Africa's Western Cape Province, close to export infrastructure and primed to take advantage of a recovery in phosphate prices.

The Company's medium-term development asset is the Hinda Phosphate Project in the RoC.

The Company has also secured a prospecting right in Ghana, to undertake further exploration work on the Aflao Project, the potential extension of the well-known, high grade and historically exploited Hahotoe-Kpogame-Kpeme deposit in Togo.
