Kropz Plc
(“Kropz” or the “Company”)

Hinda Logistics Study

Kropz Plc (AIM: KRPZ), an emerging African phosphate explorer and developer, is pleased to announce an update for its Hinda phosphate project (“Hinda” or the “Project”) located in the Republic of the Congo (“RoC”).

The Company has appointed Hatch, a leading global engineering and construction firm, to conduct a focussed assessment on the export logistics capacity at its proposed port site in Pointe-Noire, in the RoC, which is 50 km from Hinda. The results of the study will confirm the achievable capacity through the proposed port site in Pointe-Noire and highlight any major drivers influencing throughput, from truck receiving to vessel loading. This, in turn, will enable Kropz to determine the capacity for the first phase of the mining and beneficiation plant at Hinda. The Company will announce the results as soon as they become available.

About Kropz Plc

Kropz is an emerging African phosphate explorer and developer, with an advanced stage phosphate mining project in South Africa and a phosphate project in the Republic of the Congo. The vision of the Group is to become a leading independent phosphate rock producer and to develop into an integrated, mine-to-market plant nutrient company focussed on sub-Saharan Africa.
