

FEED THE WORLD

AN EXCITING GROWTH OPPORTUNITY

MARKET UPDATE
FEBRUARY 2019

THIS PRESENTATION IS NOT FOR PUBLIC RELEASE OR FOR RELEASE, PUBLICATION OR DISTRIBUTION (IN WHOLE OR IN PART) IN, INTO OR FROM THE UNITED STATES, AUSTRALIA, CANADA, JAPAN OR ANY JURISDICTION WHERE TO DO SO WOULD CONSTITUTE A VIOLATION OF THE RELEVANT LAWS OF SUCH JURISDICTION.

These presentation slides and the accompanying verbal presentation (together the “Presentation”) are strictly confidential and has been prepared by the Kropz plc (“**Company**”) solely for use at the Investing in African Mining Indaba 2019 conference.

These slides do not constitute an admission document, listing particulars or prospectus relating to the Company and this presentation does not constitute an offer to sell or a solicitation to buy or subscribe for securities in the Company and should not be relied upon in connection with a decision to purchase or subscribe for securities. No reliance may be placed for any purpose whatsoever on the information contained in this Presentation or the completeness or accuracy of the same.

The information in this Presentation or on which this Presentation is based has been obtained, in part, from sources that the Company believes to be reliable and accurate. However, none of the Company, the Company’s directors, officers, employees, its shareholders or any of their respective advisors, or any other person has independently verified such information in this Presentation and no representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information and opinions contained in this Presentation as a whole and no reliance should be placed on such information or opinions. Any opinions, projections, estimates or forecasts contained in this Presentation constitute a judgement of the Company only and should not be relied upon and are provided as at the date of this Presentation and are subject to change without notice. In giving this Presentation the Company does not undertake or agree to any obligation to provide you with access to additional information or to update the Presentation or to correct any inaccuracies or omissions from this Presentation which become apparent. To the extent permitted by law and regulation, neither the Company nor any officer, director, employee or representative of any of them accepts any responsibility or liability whatsoever for any loss, damage or liability howsoever arising, directly or indirectly, express or implied, contractual, tortious, statutory or otherwise from any use of this Presentation or its contents or otherwise arising in connection therewith. The recipient of this Presentation shall be responsible for conducting its own investigation and analysis of the information contained or referred to in this Presentation and for evaluating the merits and risks involved in the securities forming the subject matter of this Presentation.

This Presentation does not constitute an offer of securities for sale in the United States of America or in any other country where such distribution may lead to a breach of any legal or regulatory requirement, nor may they be distributed to persons with addresses in the United States, or to any corporation, partnership, or other entity created or authorised under the laws thereof. Any such distribution could result in a violation of U.S law. It is the responsibility of each recipient outside the United Kingdom to ensure compliance with the laws of and regulations of any relevant jurisdiction. Neither this Presentation nor any copy of it may be taken or transmitted into or distributed in the United States or to any resident thereof.

Neither this presentation nor any copy hereof may be distributed in any other jurisdictions where its distribution may be restricted by law and any persons into whose possession this Presentation comes should inform themselves about, and observe, any such restrictions.

The content of the Presentation has not been approved by an authorised person within the meaning of FSMA. Reliance on the Presentation for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested. Any person who is in any doubt about the subject matter to which the Presentation relates should consult a person duly authorised for the purposes of FSMA who specialises in the acquisition of shares and other securities.

This Presentation contains forward-looking statements, including but not limited to statements in relation to the Company and its respective subsidiaries, affiliated companies and projects, the future price of, and demand for, phosphates, the estimation of resources or reserves, and the realisation of resource and reserve estimates, costs of production, capital and exploration expenditures, costs and timing of the development of new deposits, costs and exploration capital of mining exploration operations, approvals licences and timing of future exploration, requirements for additional capital, governmental regulation operations and operations, and timing and receipt of approvals, licences, test results, and conversions under applicable mineral legislation. Such statements are generally identifiable by the terminology used, such as “may”, “will”, “could”, “should”, “would”, “anticipate”, “believe”, “intend”, “expect”, “plan”, “estimate”, “budget”, “outlook” or other similar wording. By its very nature, such forward-looking information requires the Company to make assumptions that may not materialise or that may not be accurate.

Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the control of the Company that could cause the actual performance or achievements of the Company and/or its respective subsidiaries and/or its affiliated companies, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, but are not limited to: general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; conclusions of economic evaluations and studies; changes in project parameters as plans continue to be refined; future price of, and demand for, phosphates; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; political instability, insurrection or war; delays in obtaining governmental approvals or financing or in the completion of development or construction activities.

Furthermore, the forward-looking information contained in this Presentation is made as at the date of this Presentation and the Company does not accept any obligation to disseminate any updates or revisions to such forward-looking statements. The forward-looking information contained in this Presentation is expressly qualified by this cautionary statement.

This document is not intended to be, and should not be construed as, any advice on the merits of, or any recommendation to any recipient or reader of this document in relation to, the purchase of shares in the Company. Recipients and readers of this document should seek their own independent legal, investment and tax advice as they see fit.

By receiving this Presentation you agree to be bound by the foregoing limitations.

Vision: to create a leading, integrated mine-to-market phosphate company

- Admitted to AIM on 30 November 2018
 - 261.9M shares in issue with market cap >\$100M
- Value underpinned by tangible assets – c.\$170M spent to date
 - \$120M on high-quality processing plant¹, mine infrastructure at Elandsfontein project
 - c.\$50M on Hinda project development
- Elandsfontein provides near-term route to positive cash flow – steady state production expected during 2020
- Solid phosphate fundamentals – market recovering from more than 10-year low
- Biggest shareholder is African Rainbow Capital (ARC), highly regarded SA BEE company
- Competitive cost structure
- Future growth pipeline supported by Hinda and Aflao entering production

Phosphate

- Essential to food production
- Market emerging from more than 10-year low
- Growth underpinned by world population expansion

>3Mtpa

Targeted rock production

Sub-Saharan Africa

- Fastest growing population on earth: doubles by 2050
- Lowest per capita/arable hectare phosphate fertilizer consumption
- Regional food demand: triples by 2050
- Shipping advantages to major markets

>50 years

Targeted life of mine

KR PZ

- Leveraging current cycle lows
- Positioning to be global top 12 phosphate-producing company
- High-quality project pipeline

>1,000Mt

Targeted phosphate resource

A sub-Saharan African phosphate portfolio

Elandsfontein

Near-term cashflow

- South Africa's second-largest phosphate deposit
- Low cadmium in resource
- Concentrate economically upgraded to phosphoric acid, DAP and MAP
- >1Mtpa processing facility and infrastructure already constructed
- Well-understood resource
- Excellent logistics and close to port
- \$120M capital spent to date
- \$16M further capital required to enter production¹
- Conditional off-take agreements secured
- Fully permitted
- Complete commissioning in 2019¹

Hinda

Medium-term growth

- Believed to be one of world's largest undeveloped phosphate reserves
- Concentrate suitable for production of phosphoric acid, MAP, DAP
- Excellent logistics and close to port
- Expected production of 1.0 to 1.2Mtpa
- Total capital cost of \$80M to \$100M
- c.\$50M invested to date
- Fully permitted

Aflao

Exploration upside

- Possible extension of well-known and exploited phosphate resources in Togo
- Potential large and high-grade deposit
- Good infrastructure and operating environment in known mining jurisdiction
- Potential to deliver high-grade phosphate rock to market²

Aflao – Ghana

- 50+1% share owned by Kropz

Hinda – Republic of Congo

- Kropz owns >98% of Cominco which owns 90%³ at project level

Elandsfontein – South Africa

- 74% owned by Kropz

Stage of development

-  Exploration
-  Development
-  Pre-production

Strong board and management team with African and mining experience

**Lord Robin Renwick of Clifton, Chairman**

- Former UK ambassador to USA and South Africa
- Former Deputy Chairman of JP Morgan Europe
- Extensive corporate mining experience

**Ian Harebottle, Chief Executive Officer**

- Former CEO of Gemfields plc
- Former CEO of TanzaniteOne Ltd
- More than 20 years' African mining experience

**Mark Summers, Chief Financial Officer**

- SA chartered accountant with more than 20 years in mining industry
- Former CFO of Gemfields plc, Amari Resources Ltd and TanzaniteOne Ltd

**Linda Beal, Non-executive Director**

- Former partner at PwC
- UK chartered accountant for over 30 years
- Tax advisor to natural resource companies

**Mike Daigle, Non-executive Director**

- More than 40 years in phosphates and fertilizers
- Former VP Operations at IMC Fertilizer
- Former senior director of Mosaic JV in Saudi Arabia

**Machiel Reyneke, Non-executive Director**

- Former Finance Director of Santam Ltd
- Current Finance Executive at ARC
- More than 35 years' corporate finance experience

**Mike Nunn, Non-executive Director**

- Founder of Kropz, TanzaniteOne Ltd
- African mining entrepreneur with over 25 years' experience

- Experienced team to mine, explore and expand existing and future assets
- Proven track record encompassing entire project development pipeline
- In-depth understanding of South and Southern African regulations and mineral laws
- Considerable experience in mining, minerals processing and infrastructure development
- Further support from independent technical panel with over 100 years' combined phosphate experience

- Phosphorous is essential element for all life forms
- One of three macro-nutrients required by plants
- Main driver of phosphate rock demand is production of a range of phosphate and multi-nutrient fertilizers
- Fertilizers are critical to boosting crop yields and sustaining global food supplies to feed expanding population
- Phosphorous is:
 - Important dietary supplement in animal feed, with demand determined by global meat production
 - Needed for wide range of industrial and food applications
 - Vital to growth of cereal and oilseed crops, eg. wheat, maize, rice and soybeans¹

3Mt phosphorous consumed in food by world population per year²

Phosphate rock 213Mt

Phosphate rock is the starting point for all downstream phosphate products³

Main applications for phosphate rock⁴

Poised for market rebound and growth

Phosphate market fundamentals

- Essential to the production of crop fertilizers and animal feeds
- Market growth underpinned by population expansion
- Fertilizer sector recovering from lowest prices in a decade
 - offers late-mover upside potential
- Phosphate rock demand expected to increase to 297Mt in 2035 (213Mt in 2017)¹
- Global phosphate rock market expanded by 40% to reach 213Mt in the past 10 years

Real rock phosphate price¹ (USD/t)

Sub-Saharan Africa

- Fastest-growing population on earth
- Lowest phosphate fertilizer consumption per capita and per arable hectare in world
- Regional food demand expected to triple by 2050
- Shipping advantages to major markets over traditional rock producers

Top four phosphate rock countries (Mt)²

Producers		Exporters		Importers		Consumers	
China	83.0	Morocco	8.6	India	7.8	China	82.9
USA	27.0	Jordan	4.8	Indonesia	2.1	USA	29.0
Morocco	26.3	Peru	3.9	USA	2.0	Morocco	17.7
Russia	11.5	Egypt	3.0	Brazil	1.8	Russia	9.6

Competitive cost structure with marketing arrangements in place

- Combined low second quartile cash cost curves
- Competitive cost position for non-integrated fertilizer producer, positioned to achieve good operating margins
- Further cost advantages realised through geographical location (and shipping net-backs)
- Conditional off-takes secured for full Elandsfontein production capacity^{1, 2}
- Potential synergies from blending of Elandsfontein and Hinda concentrate streams to meet specific market requirements

Phosphate rock 2019 FOB export cost curve³

Proposed off-take arrangements

Strategic location for sales into Atlantic and Indian Oceans

Setting standards in 'green mining' at Elandsfontein¹

- Project is fully permitted
- Commitment to extensive, on-going health and environmental monitoring
- Focus on training, development and employment from local communities
- Continued local government support
- No communities displaced for development of mine
- Drive to maximise expenditure within local municipality
- Greenheart Foundation
 - Focuses on social, charitable and environmental initiatives in and around the areas in which Kropz invests, develops and works
 - More than R1M donated to upgrade Hopefield Community Centre²
 - Commitments include Adult Based Education and Training and bursary scheme for local communities²

CONTRIBUTING TO MEANINGFUL ECONOMIC EMPOWERMENT

ARC: 100%-owned subsidiary of Ubuntu-Botho Investments (UBI).

UBI shareholding includes broad base of stakeholders – including church groups, trade unions, women's groups.

Over 400,000 people have directly benefited from annual disbursement of funds through UBI

“...we have no future in South Africa if we don't create opportunities for as many people as possible...”

PATRICE MOTSEPE, CHAIRMAN, UBI

Advanced construction and near-term production

Metric	Project ¹
Current LOM (potential to extend)	14 years
Steady-state annual production	>800kt
Phosphate rock concentrate	31% P ₂ O ₅
Final development capital	\$16M
Capital spent to date	\$120M
LOM phosphate rock production	10.4Mt
LOM selling price	\$135/t ²
LOM cash costs (FOB)	\$62/t
LOM cash flow (post tax)	\$406M
NPV _{8%} (post tax)	\$262M
Project IRR (ungeared, post tax)	26% ³
New capital IRR (ungeared, post tax)	158% ⁴

Average LOM operating cash margin of USD73/t

Elandsfontein investment to date of \$125M

Well-defined resource, box cut developed, ore exposed and ready for processing

- Roll-over mining method employed to reduce rehabilitation liability at mine closure
- Second-largest phosphate deposit in South Africa
- JORC-compliant MI&I resource of 101Mt at 7.7% P_2O_5 ¹
- Low-cost free digging, sandy deposit with average ore thickness of 17m, increasing to 30m
- Average strip ratio of 3.3:1 over LOM
- Probable reserve of 63.6Mt at 9.6% P_2O_5 phosphate¹
- Modelled using Micromine to support grade control
- Mining method proven to be successful during 2017

Resource ¹	Quantity (Mt)	Grade (% P_2O_5)	Contained P_2O_5 (Mt)
Measured	47.5	10.3	4.9
Indicated	30.3	5.1	1.6
Inferred	23.3	5.5	1.3
Total	101.1	7.7	7.7

Reserve ¹	Quantity (Mt)	Grade (% P_2O_5)	Contained P_2O_5 (Mt)
Probable	63.6	9.6	6.1
Total	63.6	9.6	6.1

Design for upgrades under way

- Process designed to upgrade to >31% P₂O₅ (68% BPL) with a capacity of >1.0Mtpa
- Opportunity for further value add through:
 - recovery of phosphate in fines discard
 - early production of direct application product
- Processing plant close to completion – \$16M capex required to enter production¹
- Initial challenges well-understood, plant modifications supported by on-going test work
- Way forward supported by independent technical panel
- Design and procurement process under way to meet required timelines¹

Issues identified		Solution	
Non-representative feed due to delayed pit dewatering	✓	Mine dewatering on-going since July 2017 – full ore sequence available	
Water circuit challenges (affecting flotation efficiency)	✓	Improved water circuit, additional thickener included	
Inadequate conditioning of amine reagent	✓	Improved conditioning due to circuit re-design	
Apatite rimming	✓	Inclusion of attrition scrubbers in circuit upgrade	

Infrastructure in place and commissioned

- 132kV power supply constructed
- Water supply secured
- 13km tarred access road to mine completed
- Leading transport service-provider for concentrate haulage
- Loading rate of four trucks per hour on site
- 43km from mine to storage
- National road to port being upgraded as national freight route
- High capacity haulage from storage to port via private haul road
- Available capacity at multi-purpose terminal at port
- Storage of up to 90,000t near port
- Loading rates in excess of 10,000t per day
- World-class testing laboratory SGS secured for vessel sampling and vessel survey

Well-positioned as lowest-quartile cost producer

- Kropz owns >98% of Cominco, which owns 90% of the Hinda Project¹
- Minority take out is under way
- DFS completed for 4Mtpa project in 2015, proved strong economics with high capital requirements
- Kropz intends to revise feasibility study, targeting 1.0Mtpa to 1.2Mtpa in the next 24 months in order to reduce capex
- Kropz works programme supported by SRK (UK)

Metric	DFS ²	Proposed plan ³
Current LOM	24 years	-
Steady-state annual production	4Mtpa	1Mtpa
Phosphate rock concentrate	32% P ₂ O ₅	32% P ₂ O ₅
Additional development capital	\$601M	\$80M-100M
Capital spent to date	\$50M	\$50M
LOM phosphate rock production	93 Mt	-
LOM selling price	\$149/t	\$162/t ⁴
LOM cash costs (FOB)	\$47/t	-
NPV _{10%} (post tax)	\$1.85B	-
IRR (ungeared, post tax)	38%	-

Believed to be one of the world's largest undeveloped phosphate reserves

- Large, shallow (>650Mt) resource¹ at 10% P₂O₅
- Opencast mining, commencing with 1:1 strip ratio
- Phosphate mineralisation is hosted by a 300m to 800m wide corridor, within a fault-bounded graben
- There are two main phosphate bearing sedimentary layers, forming a contiguous series up to 65m thick
- Total reserve of 404.9Mt² at 11% P₂O₅ phosphate
- Aim to target optimised capacity project with production between 1.0Mtpa and 1.2Mtpa, potentially increasing to 2.0Mtpa
- Optimised capacity extends LOM to >60 years

Resource ¹	Quantity (Mt)	Grade (%P ₂ O ₅)	Contained P ₂ O ₅ (Mt)
Measured	200.5	11.6	23.3
Indicated	380.9	9.8	37.3
Inferred	94.4	7.5	7.1
Total	675.8	10.0	67.7

Reserve ²	Quantity (Mt)	Grade (%P ₂ O ₅)	Contained P ₂ O ₅ (Mt)
Proven	158.7	12.1	19.2
Probable	246.3	10.4	25.6
Total	404.9	11.0	44.6

Access to infrastructure secured through mining investment agreement

- Attractive investment environment in Republic of Congo
 - renewable 25-year mining licence and approved ESIA
 - mining investment agreement signed with significant tax concessions
- 37km connection by sealed road to Pointe-Noire
 - strategic location positions Hinda to supply critical markets of Brazil, North America and India
 - largest deep water port on the African West coast
 - port access secured with 12m draft
- Available, low-cost grid power near mine site
- Fresh water available at site

Potential extension of well-known, shallow Togo deposit

- Phosphate discovered in Keta Basin by Geological Survey of Ghana in 1960s
- Drilling identified phosphate bed ranging from 5-11m thick with grade of 14 to 22% P_2O_5 in 1960s
- Mobile Metal Ion (MMI™) study determined phosphate elements are present
 - similar in nature to results obtained across HKK deposit in Togo
- Shallow deposit with potential for high yield operations
 - estimated resource in Togo (2011) was 1.74Bt across 36km strike
 - Kpeme Mine in Togo produces 36% P_2O_5 concentrate from washing process only, no flotation is necessary
- Located 15km from Port of Lomé in Togo, 180km from Accra
- Prospecting licence received for 132km² target

Short, medium and long term growth pipeline

An aerial photograph showing a vast desert landscape with numerous circular agricultural fields. The fields are arranged in a grid-like pattern, with some fields showing concentric circular tracks, likely from center pivot irrigation. The fields are a vibrant green, contrasting sharply with the surrounding tan-colored desert soil. The perspective is from a high angle, looking down on the fields as they stretch towards the horizon.

Annexures

“Over the next 50 years farmers will have to produce
as much food as they produced in the
last 10,000 years”
